

MT SERIES

THROAT MICROPHONE/earpiece

Peltor's throat microphone/earpiece combination is specifically designed for situations and environments where boom microphones are ineffective or cannot be used. This product is ideal in applications where respirators are used and 2-way communication is essential:

- ▶ **First Responders**
- ▶ **Hazmat Teams**
- ▶ **Public Safety**
- ▶ **High Angle Rescue Teams**
- ▶ **Lightweight, compact**
- ▶ **Intrinsically safe version available**
- ▶ **Adaptable to any portable radio**

MT SERIES

throat microphone / earpiece

Incorporating Peltor's latest in contact microphone technology this product has excellent voice recognition by picking up the vibrations from the user's voice box. The adjustable rubber earpiece has a speaker in it allowing the user to monitor clearly all incoming radio transmissions. The Throat Microphone/earpiece combination is so versatile that it can be used with any existing respirator or facepiece apparatus. In addition, with our large selection of radio push-to-talk (PTT) adaptors it will work with your existing or new radio systems.

Wide selection of radio PTT adapters available

Slim-line palm activated button

Palm activated mushroom button
